

Your Waste Collection

BIN PLACEMENT

On the naturestrip

Bin should be at least 30cms apart.

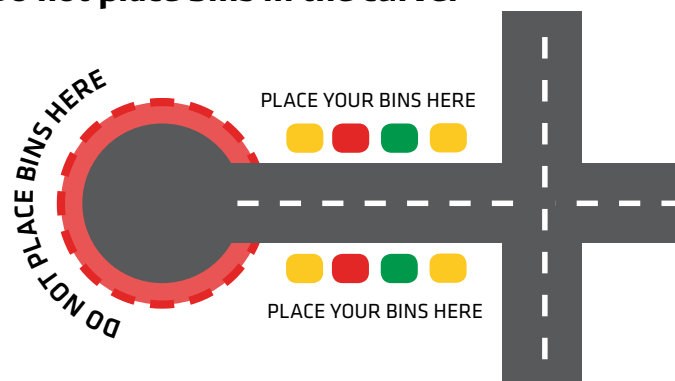

Bins should be 30-60 cms from the gutter on the naturestrip.

If you live in a court

Courts are difficult areas for bin collection due to powerlines, parked cars and a tight turning circle for the truck. To ensure a safe collection please place your bins in the straight section only.

Do not place bins in the curve.

Timing

- > Bins must be placed out on the night before collection.
- > Bins must be returned to the property on the day of collection (within 24 hours).

Place your bin clear of:

Power poles & lines.

Large trees.

Parked cars.

Do not place bins on the road, pathway or driveway.

Your Waste Collection

IF YOUR BIN ISN'T COLLECTED

Your bin will not be collected if it is:

too heavy (80kg+)

overloaded (lid cannot close)

contaminated with an incorrect item

A sticker will be placed on your bin and will not be collected until the next scheduled collection.

- > If it has been stickered because it is too heavy or overloaded - items need to be removed.
- > If it has been stickered because it is contaminated, the incorrect item must be removed.

HARDWASTE AND BROKEN/MISSING BINS

For large household items Council offers one free at-call hard waste collection per year. Call 9721 1915

Contact Council if your bin is broken or missing on 8571 1000

Your Waste Collection

OVERWEIGHT BINS

Bins too heavy

Bins will not be collected if they weigh more than 80kgs.

Mechanical arm can only lift 80kgs

Compact before not after

Compact recyclables before placing them into bins. This will ensure you have more space for your recycling.

Avoiding overweight bins

- > Shake dirt from plant roots
- > Place correct items in the bin

NO gas bottles

NO timber or bricks

NO chemicals, paints or solvents

NO soil or rubble

NO large logs or rubble

NO furniture or TV's

Do not over-compact bins

Don't risk your bin not being emptied.

Over compacting your bin can cause it to jam.

These items can damage the truck during collection and pose a safety risk to the drivers.

Your Waste Collection

PACKING YOUR BIN

Bag your general waste

No plastic bags in recycling

Remove recyclables from plastic bags before recycling

LIDS CLOSED PLEASE

Bins must have all their lids closed for collection to avoid spillage and litter.

Open bin lids also attract animals which spread litter.
